WHO we are ?

Proximiteam is a boutique software factory founded with the aim to support North American companies to overcome the challenges in software development and data analytic projects. Our nearshoring teams of experienced software engineers create innovative systems and applications for every industry

WHAT we do ?

Our services include custom software development, systems integration, data analytics and BI, software testing, maintenance and support.
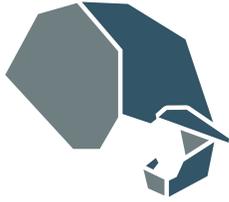

HOW we do it ?

The combination of our nearshore engagement model, business approach, experienced pool of skilled engineers and more than 15 years of performance experience, provides a reduced time to market and a lower total cost of ownership.

WHY work with us ?

Innovative companies need innovative methods and practices to increase productive and shorter time to market. Our agile and flexible models have helped customers to reduce development cycles by more than 20%, reducing costs and improving the quality of the software.
