Overcome IT resource requirements with Milestone professionals dedicated to your most challenging needs

With an ever-changing staffing marketplace, businesses are quickly adapting to the new reality of the hybrid workplace. This has made finding resources for critical projects more competitive and challenging than ever before. To stay agile, businesses are needing increased flexibility to keep pace with a growing demand for resources.

Easily scale to meet IT personnel requirements

Consulting Services are part of Milestone's suite of Application Services that provide critical development and staff augmentation services on-demand to teams that need skilled resources and the experience to handle any challenge.

Milestone works with you to create an ideal solution for your needs

The Milestone Advantage:

- Understanding the nuances of each job, going beyond job descriptions to focus on what's most important for hiring managers
- Acting as active participants in supplier calls, with insightful questions to better screen candidates
- Assembling a specialized database of Project Managers and Scrum Masters with experience relevant to your industry

Comprehensive Staff Augmentation, Project Management, and Managed Services solutions aligned with your business goals

If you are an IT organization with growing strategic project requirements, Milestone provides you with the best resources to meet your business goals. Fulfill your long and short-term project needs with high-quality professionals and managed solutions that help accelerate and transform your business.

Staff Augmentation

These include contract and contract-to-hire options, and address the challenges of a rapidly changing IT environment

Project Management as a Service (PMaaS™)
