A telemedicine visit is the same as an in-person visit with your doctor, just without the travel.

If you don't have the technology for a telemedicine visit at home, the ability to travel to your physician's office, or you simply don't have the time to drive to Charleston for an appointment, our staff can connect you with your provider quickly and easily.

A nurse at the center will facilitate a secure video visit with your doctor, and you will get the same personalized attention and excellent care without the inconvenience or expense of leaving town.

Ask us today if you'd like to learn more!
