

# A1C numbers are just a part of the bigger picture

The only stops Manny wants to make are passenger pick-ups. When prescribing an appropriate add-on therapy for patients like Manny, consider the bigger picture of his treatment course

A1C lowering

Tolerability

Target the  
underlying disease

For more information on A1C lowering, tolerability, and more, visit

#### Selected Important Risk Information

JANUVIA is contraindicated in patients with a history of a serious hypersensitivity reaction to sitagliptin, such as anaphylaxis or angioedema.

There have been postmarketing reports of acute pancreatitis, including fatal and nonfatal hemorrhagic or necrotizing pancreatitis, in patients taking JANUVIA. After initiating JANUVIA, observe patients carefully for signs and symptoms of pancreatitis. If pancreatitis is suspected, promptly discontinue JANUVIA and initiate appropriate management. It is unknown whether patients with a history of pancreatitis are at increased risk of developing pancreatitis while taking JANUVIA.
